

# Genesis 54

Seaspray knows the backyard is becoming the focus of summer entertainment. The Genesis 54 is more than a swimming pool...it is emotion...it is pride in your home...it is fun with style. The Genesis combines the features of injection molded resin with design elements never seen before in an affordable backyard swimming pool. Tru-Radius top seats and higher density resin are among the most distinctive advantages to this Seaspray Pool.

The Genesis 54 pool comes standard with a Wide-Mouth skimmer system for superior skimming action and a cleaner pool. The Seaspray Genesis 54 is by far the better choice.

The Genesis 54 features a buttress free oval design that uses up less space in your backyard. It is both efficient, and attractive

## Round

15' X 54" 18' X 54" 24' X 54" 27' X 54" 27' X 54" 30' X 54"

## Oval

15' X 26' X 54" 15' X 30' X 54" 18' X 33' X 54"

### WARNING

SHALLOW WATER

DO NOT JUMP

DO NOT DIVE

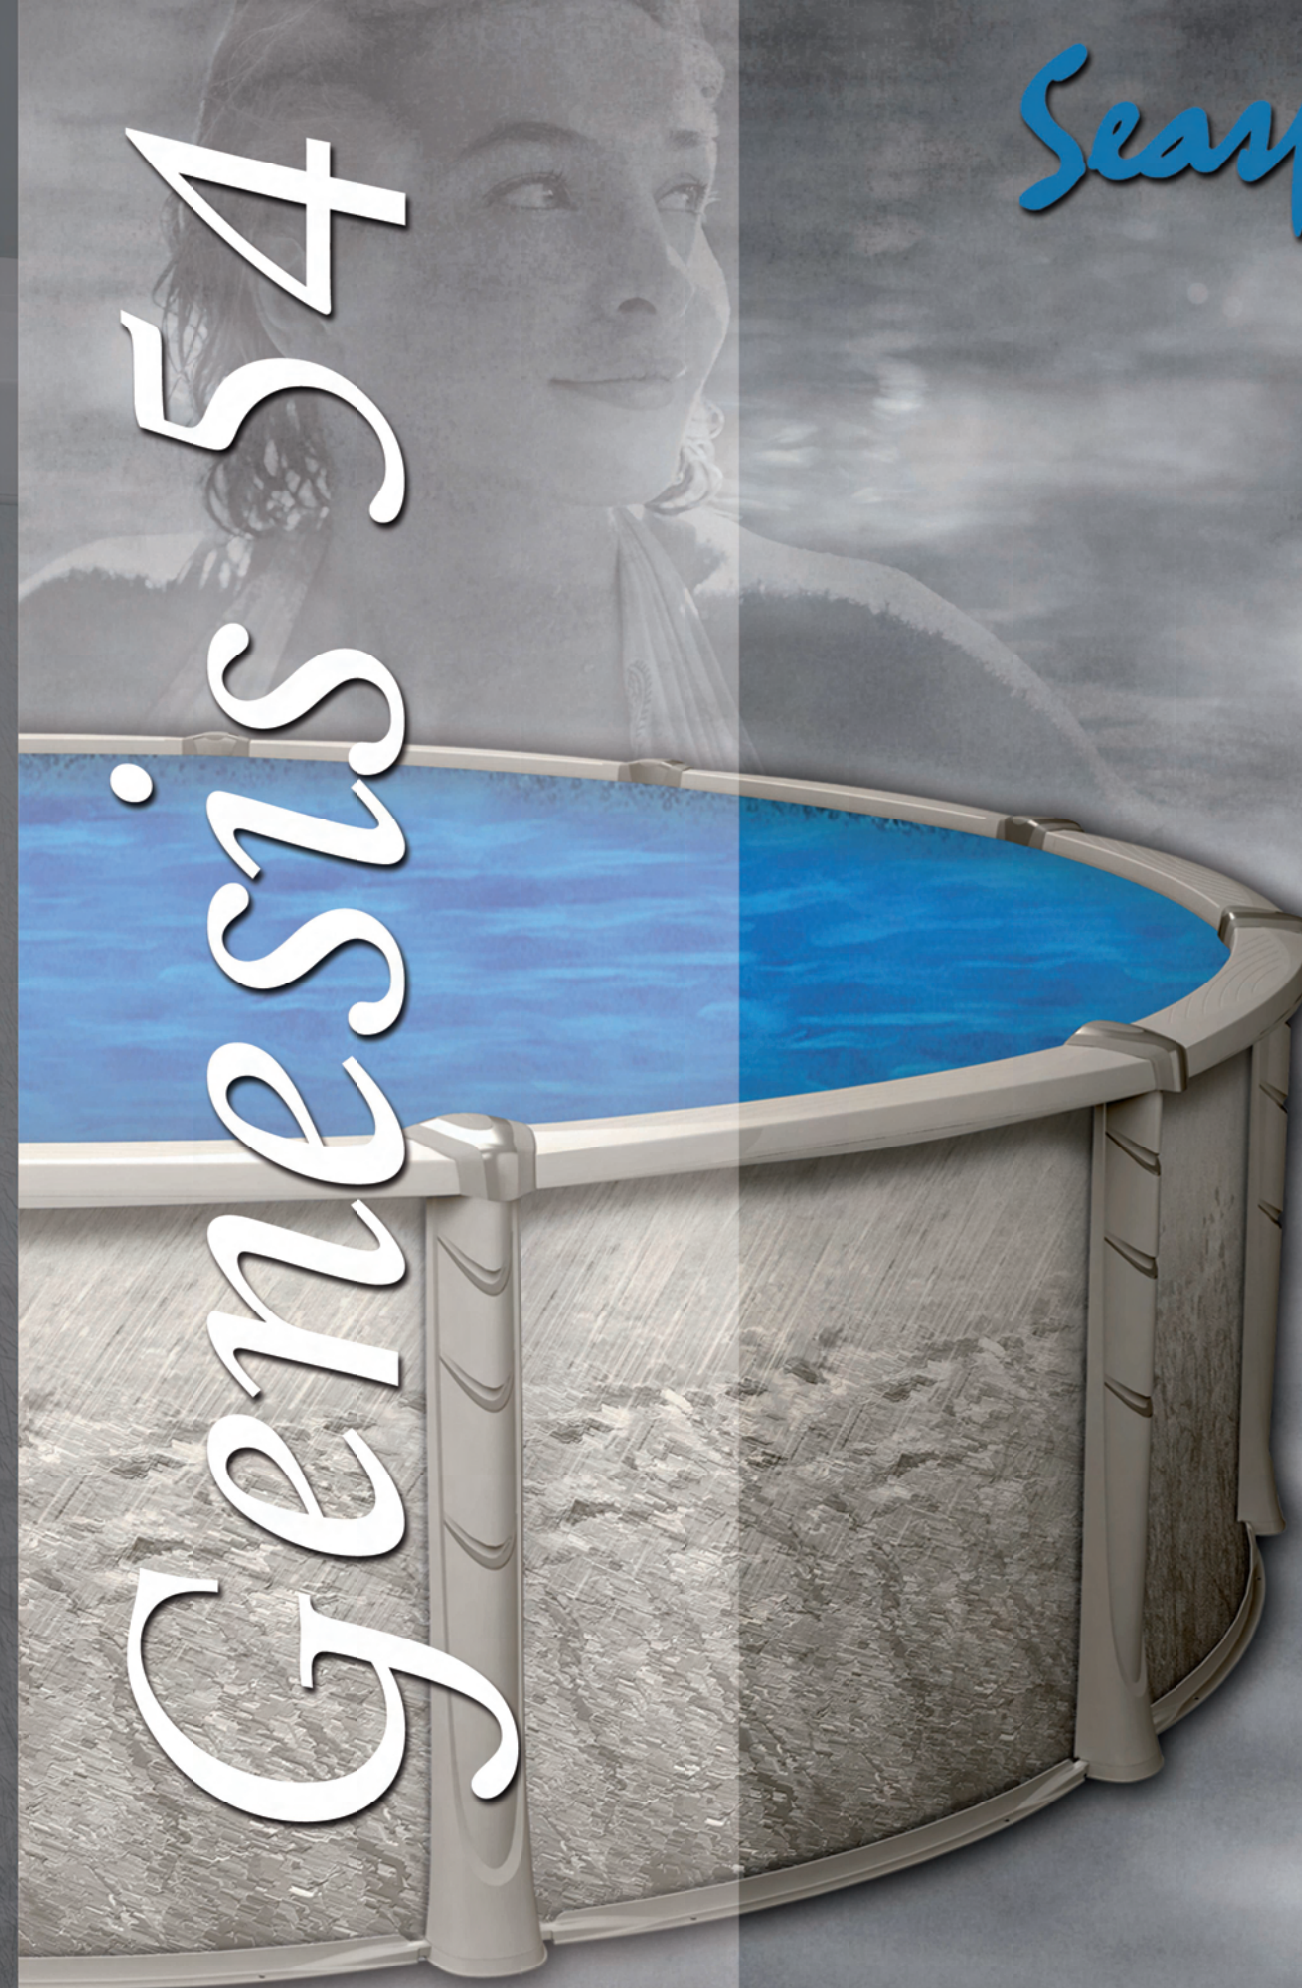

DROWNING  
OR CRIPPLING  
INJURY MAY  
RESULT

# Genesis 54

## Our Innovation to Your Reality.

A true radius shape that is proportionally balanced with the pool frame in size, style, fit, and finish...

The Genesis 54 pool features a beautiful Prelude wall that is color coordinated with the natural pool frame colors. Our designers carefully selected a color palette that would blend into, and accent your backyard. The entire ensemble is a delight to the eyes...

Computers are now able to model the extreme stress that above ground pools are subjected to from water pressure, ultra-violet sunlight, wintertime sub-zero temperatures and extreme summer heat. Computer created virtual 3D pools show us how the pool reacts. Advanced computer programs perform finite element analysis on the pool, showing the areas that potentially have the most problems. We then select the right materials and design each part to withstand the stress it will be subjected to over its lifetime. The result is a pool that will last for years, trouble free, maintenance free.

The Genesis 54 frame parts are manufactured using an injection molding process. This process allows the Genesis 54 frame to be reinforced with ribbing on the underside of the pool frame skin. The ribbing is increased in depth, thickness and quantity in the areas where it is needed most.

The bottom plate is integrated into the 1 1/4" wide resin bottom rail for greater rim strength.

Every frame part of the Genesis 54 pool is made of injection molded resin. The specially formulated resin is made using a "recipe" that is engineered particularly for an above ground pool application. The resin is UV and impact resistant. The resin is Color-Thru™ so that even if scratched the frame parts have the same color inside and out !

The traditional swimming pool "top cap" is replaced, on the Genesis 54 pool, with a joint cover that is installed "into" the pool frame. The result is that this part becomes an architectural highlight rather than a clumsy cap.

Sweeping Tru-Radius top rails and gently arcing uprights define the Genesis 54 pool frame. The frame parts are proportionally balanced in size, style, fit and finish. Every detail, texture, joint, and curve has been looked at carefully and designed to enhance the experience.

Build your backyard dream with... *Searspray*
