Aboveground Pool Cleaner

The world's best built  
aboveground pool cleaner

For the ultimate in reliability, simplicity, and performance in automatic pool cleaning, there's only one choice – E-Z Vac. With only one moving part, E-Z Vac works when your pool pump runs, using your pool's existing filtration system to remove leaves, dirt, sand, insects, and other debris. E-Z Vac is designed and manufactured with the same quality and durability that has made Kreepy Krauly inground pool cleaners the number one choice of pool owners and pool professionals worldwide.

## Aboveground Pool Cleaner

### Here's why E-Z Vac is the best automatic aboveground pool cleaner you can buy...

- E-Z Vac quickly attaches to your pool skimmer in minutes, so it can start vacuuming leaves, dirt, and debris from your pool today!
- E-Z Vac's unique Flapper, the unit's only operational moving part, is designed to deliver years of long, dependable service.
- Works flawlessly in both flat and dish-shaped bottom pools with a banked or radius cove.
- Cleans using a true random-pattern coverage to help ensure your pool's floor is thoroughly vacuumed.
- Free skimming valve automatically regulates water flow to assure proper cleaning speed and allows simultaneous skimming of surface debris while vacuuming.
- 24-Hour Customer Support. Our toll-free customer helpline is available to assist you 7 days a week. Available in U.S. and Canada only.
- Requires virtually no maintenance. There are no wheels or gears to jam or wear out, no diaphragms to replace, no bags or compartments to empty. You'll spend more time enjoying your sparkling clean pool rather than maintaining it.

Ask your Pool Professional about Pentair's comfort and convenience options to add a whole new dimension to your pool living:
