

Tireless performance. Simple operation.

The Warrior filter system pairs our proven Maxim™ pump with our Warrior automatic regeneration D.E. filter. Filtering with diatomaceous earth (D.E.) removes particles so small, they are measured in microns...particles the human eye can't even detect but noticeably affect water clarity. This harmoniously engineered combination features superior filtration efficiency and automatic D.E. regeneration.

Standard features include:

- Injection molded thermoplastic Warrior filter tank and base for strength and durability.
- Automatic D.E. regeneration results in longer filter cycles.
- Filter lock ring allows quick and easy servicing.
- Maxim pump's self-priming design protects internal components and ensures long life.
- Large pump strainer basket for maximum debris collection.
- See-through strainer pot lid for easy inspection.
- Pump motor features on/off switch for convenience.

Warrior™

Aboveground D.E. Filter System

Automatic regeneration for extended filtration cycles

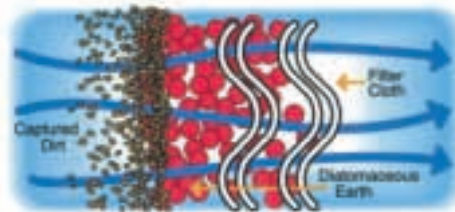

Warrior's exclusive grid design extends time between cleanings and features automatic regeneration during the off cycle. That means you and your family can enjoy a clean, clear pool the carefree way.

Other features include:

- Exclusive filter grid design ensures even distribution of D.E. precoat for optimum filtration efficiency.
- High Flow™ manual air relief valve and continuous internal air relief work together to maintain optimum filtration efficiency.
- 1½" filter drain and washout for ease of maintenance.
- System includes light-ready, directional water return fitting for convenient and economical upgrade of AquaLuminator™ lighting. (Part # 619398)
- Ten-year filter tank warranty. See warranty for details.

How a D.E. Filter Works

When diatomaceous earth (D.E.) is introduced into the filter system, it coats the filter cloth. As water passes over the filter grids, the D.E. particles capture even the smallest suspended dirt particles.

(AquaLuminator)

Warrior—D.E. Filter Flow Rates

Description	Vertical* Clearance	Filter Diameter	Flow Rate GPM	Turnover Capacity (Gallons)		
			Res.**	6hrs.	8hrs.	12hrs.
Warrior 44	41"	13"	44	15,840	21,120	31,680
Warrior 66	63"	13"	66	23,760	31,680	47,520

*Required clearance to remove filter elements

**Maximum flow rate
