

HAYWARD®

Booster Pump

»»» For Pressure Cleaners

USE UP TO
35%
LESS ELECTRICITY

Designed to be exceptionally quiet, the Hayward® Booster Pump also offers exceptional energy savings—using up to 35% less electricity than other models on the market. Add on an elevated base for increased protection from damage, and you've got a pump that offers total peace of mind.

KEEPS NOISE AND COSTS TO A MINIMUM

The Hayward Booster Pump not only runs quieter—it also saves more energy. Installing one could mean lowering your pool-related electricity costs by as much as 35%.

WORKS WELL ANYWHERE

The Hayward Booster Pump is compatible with any pool cleaner that requires a booster pump. Its tall mounting base allows for increased motor ventilation and protection from flooding, and its volute can be re-oriented for horizontal discharge if needed.

MAKES INSTALLATION EASY

With 1½" union fittings, the Hayward Booster Pump is easy to install and remove. Its ¾" hose barb union adapters and flexible hose make retrofitting in existing pool pads simple.
