

Meet AVIA: Raypak's latest Innovation

AVIA is a Smart Pool and Spa Heater that Elevates both Function and Design

Smart Automation

Smart pool control automaton system built right into the heater. Enables you to automate and manage your pool temperature.

Smart Scheduling

AVIA heats and learns the size of your pool and will let you know when your pool is ready for your set temperature.

Smart Ecosystem Manager

Enables you to manage your heater, pumps, water features and scheduling.

Integrated Wi-Fi

Provides a smart connection for real-time service alerts & control from anywhere.

Raymote™ Temperature and Heater Control

Raymote Mobile App allows you on-the-go control of your pool temperature and so much more.

Protek Shield™

Is a cutting-edge module that protects the heat exchanger from corrosion, prolonging the life of the AVIA pool heater.

Small and Easy to Install

AVIA weighs under 140 pounds and can be installed on a standard 2×2 foot pad. It's the perfect heater for new and replacement.

Installation Versatility

AVIA can be rotated on all 3 sides giving you more installation options. It has right and left water connection and gas connections can be configured to be on the right or left side.
