ADVANCED LED TECHNOLOGY

Spa Electrics **ATOM** range of compact high performance LED pool lights provide intense pool illumination while consuming less than 12 watts of energy.

These technologically advanced pool lights offer industry leading innovations that include a pluggable cable system for easy installation and fast winterization, integration with leading pool automation systems for simple operation and **Dousink & Pulsewave** for superior cooling and longevity.

All this coupled with Spa Electrics own driver and high-output LED module for class leading brightness and energy efficiency.

With models available to suit **vinyl, concrete** and **fibreglass** pools, there's an **ATOM** light to suit all applications.

INTENSE ILLUMINATION

- >> Brighter illumination than a 100w halogen globe
- >> Available in **Single & Multi Color** models
- >> Integration with **leading pool control systems**
